

Private Chat GPT for private equity firm

Private Equity Firm

Developed a secure conversation AI platform leveraging GPT models that enables users to have interactive conversations. Deployed the platform on client's Azure ecosystem and implemented server ring-fencing measures, along with real-time logging of prompts, usage, and model costs.

Private equity firm company needs private ChatGPT

Picture this...

You're looking for a secure conversation AI platform leveraging GPT models that enables users to have interactive conversations along with real-time logging of prompts, usage, and model costs. You want to harness the power of Generative AI in a secure manner in aiding daily activities such as content generation, building financial reports and investor calls notes summarization, market research support, etc.

You turn to Accordion.

We partner with your team to develop a secure conversation AI platform leveraging GPT models that enables users to have interactive conversations, deploy the platform on Azure ecosystem and implement server ring-fencing measures, along with real-time logging of prompts, usage, and model costs, including:

- 1) Designing and developing a user-friendly conversational AI platform leveraging Azure OpenAI APIs
- 2) Implementing various features to engage users of the platform including searchable chat history, custom instructions, prompt guides, and user feedback (like/dislike). Additionally, also developing a 'Share Chat' feature to enable seamless collaboration with other members of the organization.
- 3) Deploying the platform securely on client's Azure environment, with ring-fencing measures implemented to ensure data integrity and confidentiality
- 4) Developing a dashboard on Power BI to enable real-time monitoring of usage trends and costs

Your value is enhanced.

You have a potential savings of ~\$3M through enhanced operational efficiency and accelerated response times by reducing the time spent on manual data interpretation and optimizing report preparation. You have also enabled the organization to safely harness the power of Generative AI in their daily workflows without concerns of security and data privacy.

KEY RESULT

- ~\$3M potential savings

VALUE LEVERS PULLED

- Generative AI
- Application development
- Product development

Private ChatGPT for Private Equity Firm

Situation

- Client wanted to harness the power of Generative AI in a secure manner in aiding daily activities such as content generation, building financial reports and investor calls notes summarization, market research support, etc.
- Partnered with the client to develop a secure conversation AI platform leveraging GPT models that enables users to have interactive conversations along with real-time logging of prompts, usage, and model costs.

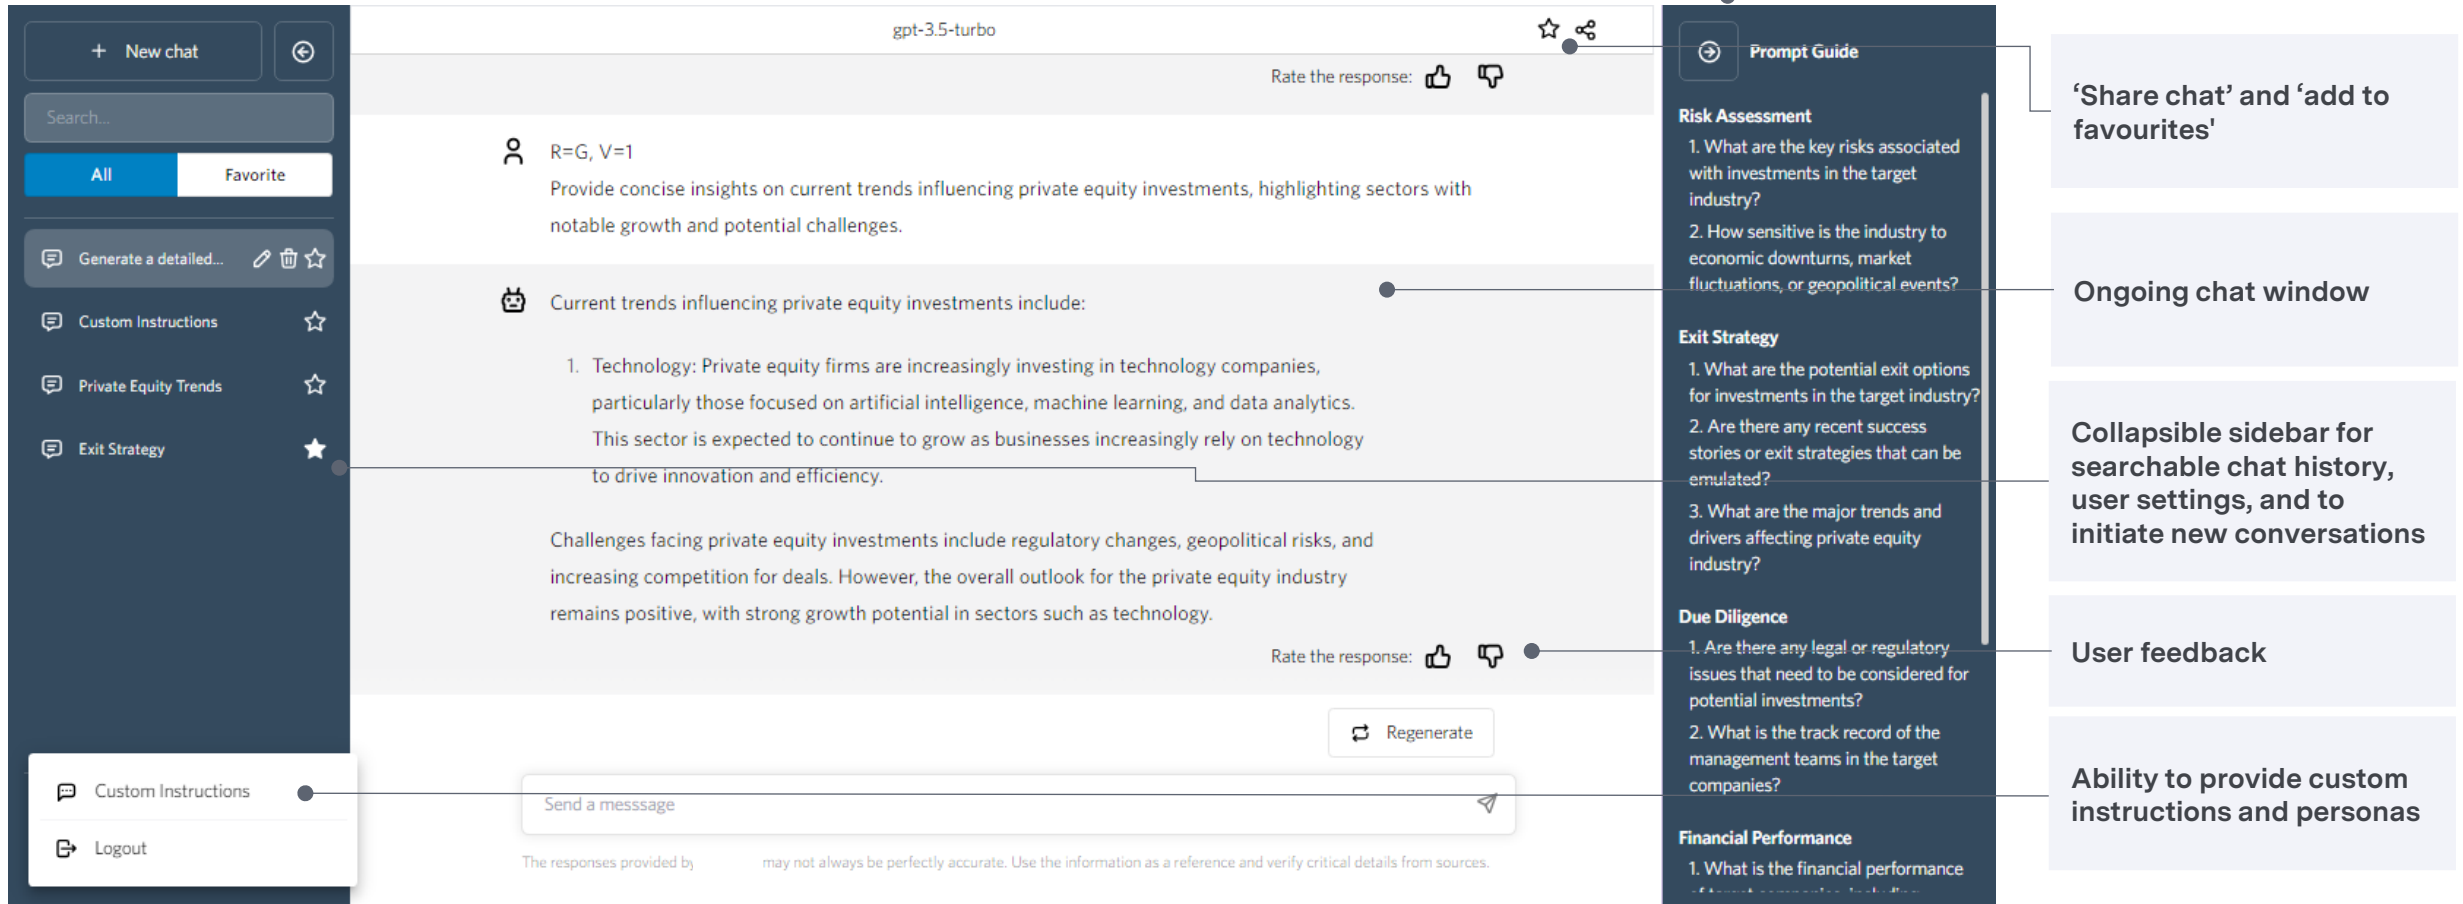

Accordion Value Add

- Designed and developed a user-friendly conversational AI platform leveraging Azure OpenAI APIs
- Implemented various features to engage users of the platform including searchable chat history, custom instructions, prompt guides, and user feedback (like/dislike). Additionally, also developed a 'Share Chat' feature to enable seamless collaboration with other members of the organization
- Deployed the platform securely on client's Azure environment, with ring-fencing measures implemented to ensure data integrity and confidentiality
- Developed a dashboard on Power BI to enable real-time monitoring of usage trends and costs.

Impact

- Potential savings of ~\$3M through enhanced operational efficiency and accelerated response times by reducing the time spent on manual data interpretation and optimizing report preparation
- Enabled the organization to safely harness the power of generative AI in their daily workflows without concerns of security and data privacy

Conversational AI Platform UI

Usage Summary Dashboard

Dashboard providing visibility into Generative AI platform usage trends across metrics such as users, queries, costs, and satisfaction
