

Group and events booking analysis

Group and events booking analysis

Analyzed the Group and Event Products Bookings to gain insights into booking patterns, preferences, and trends to optimize scheduling, allocate resources effectively, and improve overall event management

Indoor skydiving company needs group and events booking analysis

Picture this...

You're looking for the gaps, set up robust analytics across the functional areas and improve visibility across client's operations through analytics across customer demographics, market sizing, customer preferences, event scheduling etc.

You turn to Accordion.

We partner with your team to analyze the Group and Event Products Bookings to gain insights into booking patterns, preferences, and trends to optimize scheduling, allocate resources effectively, and improve overall event management, including:

- 1) Assessing the market potential across US and mapped the same to location's utilization levels and capacities. Benchmarked the best performing locations and highlighted opportunities of efficient resource planning
- 2) Partnering with the Client's sales team to geographically triangulate customer leads on a map using data from HubSpot, Client POS and Databases such as NCES which helped the sales team in targeting these leads efficiently
- 3) Enhancing visibility of unutilized slots/classes across locations which could be leveraged extensively by the sales team when offering discounted deals to a group
- 4) Implementing an excel model to prepare event schedules for all the locations and products (200+ files) and automated the process to push the same to client's website through an RPA solution using UiPath

Your value is enhanced.

You have enhanced sales team's efforts and supported with precise targeting which resulted in a ~50% YoY increase in Sales of specific product categories. You have also automated processes for preparing and uploading the schedules saved ~2 FTE days per week and reduced the delay for updated schedules to reflect in client's website, enabling a smooth booking experience for the customer.

KEY RESULT

- ~50% YoY increase

Prospect deals by locations

Prospect Deals by Locations – Captures all leads near a location on a map with a segregation between prospect and current deals to help the sales team efficiently allocate efforts

Slot availability across locations

Highlights times of a day with highest incremental revenue for a product booking

Integration of DW and HubSpot for marketing and sales leads

- 1 Contacts data is downloaded from HubSpot and pushed into DW (Datawarehouse)
- 2 Contacts data from HubSpot is compared with the POS data in DW to identify new marketing contacts
- 3 New marketing contacts data is pushed into HubSpot to generate HubSpot contact ID which will be leveraged to map contacts to the relevant deals
- 4 Marketing contacts data is downloaded along with the newly generated HubSpot contact ID
- 5 Deals data corresponding to these contacts is generated in DW and pushed into HubSpot
- 6 Uploaded marketing contacts and deals data is associated with each other in the HubSpot
- 7 Marketing Contacts and Deals data is downloaded from HubSpot and pushed in DW
- 8 Marketing contacts and deals data is compared with the latest POS data in DW to identify any changes
- 9 Existing marketing contacts and deals data is updated in the HubSpot in case of any changes

Process to update existing Marketing Contacts and Deals data in HubSpot

Note: HubSpot API is leveraged for setting up these processes
